

## The Effectiveness of Boycotting

The article on the plight of the nurses at the Newark UMDNJ Hospital calls for all of us to pray – boycotting branches and doctors who are a part of the UMDNJ network is another way of making your prayer active while we hope for spiritual realization to impact the people making their darkness a condition for employment!

Another active extension of prayer is to write letters and keep on writing them, especially during this time of year:

### **Mail**

The University Hospital  
150 Bergen Street, C- 431  
Newark, New Jersey 07103

### **Phone**

(973) 972-4300

Or go to:

<http://www.theuniversityhospital.com/contact/> and click on free card and tell them what you feel – do it everyday, make it a family project –they need to know that God’s power extends over many of us and we are fed up with these skewed interpretation of rights!~
